Hi,

My name is Hampus Andersson and I am currently studying fullstack development. I am looking for an LIA internship from January 4 to March 12, 2027.

I have experience from both a larger company environment and working directly with clients. During my time at Volvo, I worked with internal systems, and through my own web agency I build and maintain websites for real customers. That has helped me understand not just how to build something, but also why it matters.

I work across the full stack, but I am especially interested in backend and how systems are structured. At the same time, I like connecting it with the frontend and seeing how everything fits together.

I try to take ownership of my own development. I have worked with real clients, built projects, and spent time thinking about what kind of developer I want to become. Now I am looking for a place where I can keep learning and also contribute.

What I bring is curiosity, reliability, and a willingness to figure things out. I am not afraid to ask questions, and I try to take responsibility for the things I work on.

Thank you for your time. I look forward to hearing from you.

Best regards,  
Hampus Andersson
